

ABSTRACT OF THE DISCLOSURE

There are provided an instruction form retrieval apparatus for retrieving an instruction form accessible to a user based on information on the user, an instruction form execution apparatus, an instruction form management system having the instruction form retrieval apparatus and the instruction form execution apparatus, and an instruction form retrieval method for retrieval of the instruction form accessible to the user based on information on the user. An instruction form retrieval apparatus of an instruction form management system retrieves information on an instruction form management apparatus holding an instruction form accessible to a user, based on information on the user, and transmits information on the instruction form management apparatus to an instruction form execution apparatus. The instruction form execution apparatus accesses an instruction form management apparatus based on the information on the instruction form management apparatus, and the instruction form management apparatus transmits the instruction form accessible to the user.
